Introduction

Lightspot BS Normal CRI series LED Light engine is based on our main patent----- MCOB (Multi-Chips On Board). Lightspot LEDs combine tens or hundreds power LED chips with a rugged package capable of operating in excess of power. Lightspot LEDs maximumly decrease LED uncomfortable glare and also Zebra strips, at the same time increase LED light efficency and reduce thermal resistance.

Features:

◇ Area light source, which can avoid glare
◇ More energy efficient than incandescent, halogen and some fluorescent lamps
◇ Industry’s lowest thermal resistance
◇ Long operating life, lumen maintenance of greater than 70% after 50,000 hours
◇ Low forward voltage operated
◇ Instant light (less than 100ns)
◇ Lead Free product, RoHS compliant
◇ No UV
Application

◇ Automotive interior / exterior lighting
◇ Automotive signal lighting
◇ General Torch
◇ Architectural lighting
◇ LCD TV / Monitor Backlight
◇ Projector light source
◇ Traffic signals
◇ Task lighting
◇ Decorative / Pathway lighting
◇ Remote / Solar powered lighting
◇ Household appliances

Temperature Characteristics

Please ensure the maintenance of heat radiation
not to exceed Tp temperature over the rating in
operation.

Derating Curves characteristics

Forward Current Derating Curve

To keep Tp(PAD-temperature) lower than rating enough heat-radiation performance needs to be secured by using an adequate heat sink.
